clean floor

well-kept
upholstery

refreshed litter box

nice smelling
laundry

As a pet owner, at each stage of its life, you may encounter a problem of urine and faeces left by your pet in places not intended for this purpose (on the floor, furniture or couch).

Most frequently, it occurs in case of:

- puppies and kittens during hygiene training,
- grown-up animals with behavioural problems,
- senior pets with urological disorders,
- animals after accidents, serious diseases or convalescence.

Unpleasant surprises at home?

USE ► SPRAY

ON HARD AND SOFT SURFACES

Thanks to the applied **bioenzyme technology**, **Mr. Smell Spray** effectively eliminates unpleasant smell of urine from any hard and soft surface, giving it a **citrus smell**, which deters the animal from a given place. In this way, it helps to fight against the habit of terrain marking. There are three types of sprays available to suit the specific species of animals: **Dog, Cat, Ferret & Rodent**.

Directions for use: Remove visible soiling. Spray thoroughly the unpleasantly smelling area. Allow to dry. Repeat if necessary. Before using the product for the first time, check the colour fastness on the surface in a less visible place.

Volume: 500 ml.

FOR CATS LITTER TRAYS AND RODENT CAGES

Thanks to the applied **bioenzyme technology**, **Mr. Smell Cage and Litter tray** effectively eliminates unpleasant smell of pet's urine, prolonging the freshness of litter in cages and trays. The **lavender scent** is well tolerated by pets.

Directions for use: Wash the surface of the cage or litter tray (preferably using a detergent) and spray thoroughly, add litter or other commonly used material. Until the litter is changed, repeat the application of Mr. Smell spray as needed, applying it directly on the material after cleaning the animal faeces.

Volume: 500 ml.

FOR SOFAS AND CARPETS

Thanks to the applied **bioenzyme technology**, **Mr. Smell Sofa and Carpet** with a "quick wash" function removes the smell of urine and urine stains (new and old) from carpets, upholstered furniture and other soft surfaces. **Citrus fragrance** deters the animal from habit of terrain marking.

Directions for use: Before using the product for the first time, check the colour fastness on the surface in a less visible place. Remove visible soiling. Spray thoroughly the soiled place, so that the cleaner covers the stain and the area around it. Leave it for a few minutes and then wipe with a damp piece of cloth or a sponge to remove residues. In case of old stains, the cleaner should be left for a few hours and covered with foil to prevent it from drying.

Volume: 500 ml.

Unpleasant surprises on the floor?

USE ► LIQUID FLOOR CLEANERS

FOR FLOORS

Mr. Smell Floor liquid cleaners remove even the most difficult dirt from the floors without damaging the surface. Thanks to the applied **bioenzyme technology**, the cleaners effectively eliminate unpleasant organic smells like animal urine and faeces. Mr. Smell cleaners leave a long-lasting fragrance, pleasant for humans and animals. They are available in two kinds of scents, **flowery or lavender**. The liquids prove themselves excellently in applications in houses, in which animals live.

Directions for use: Directions for use: Dilute the preparation – one cup in 5 l of water. It does not require rinsing with water except for surfaces that may come into contact with food.

Volume: 1 l.

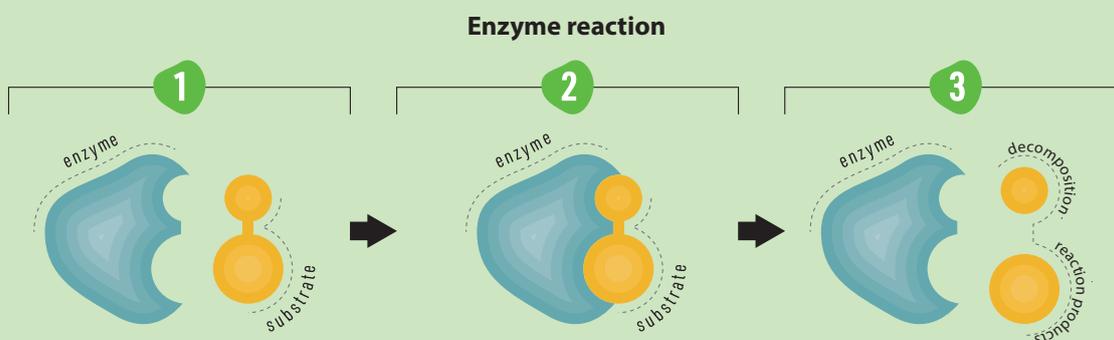

What makes Mr. Smell products so effective?

BIOENZYME TECHNOLOGY!

This modern solution allows to effectively eliminate organic odours left by pets. Thanks to this technology, the cleaner decomposes the main component of urine, i.e. uric acid.

As a result of metabolic processes, pets egest most of the nitrogen in the form of uric acid, and nitrogen is responsible for the intense and unpleasant smell of urine.

1. The enzyme with the substrate (the organic smell in the form of e.g. uric acid molecules) must fit together spatially, just like a key to the lock.
2. The enzyme binds to the substrate molecule, forming an enzyme-substrate complex.
3. This complex decomposes, thus completely neutralizing the unpleasant odour.

Unpleasant surprises on animal beds, beddings, mats, blankets, clothes or toys?

USE ► WASHING LIQUIDS AND FABRIC SOFTENERS

STEP 1: Laundry

Mr. Smell Laundry liquid effectively washes stains and dirt. Thanks to the applied **bioenzyme technology**, Mr. Smell effectively eliminates unpleasant organic smells like animal urine or faeces. The **lavender scent** is well tolerated by pets.

Directions for use:

1 cap makes a 65 ml dose of the liquid

Washing temperature: 30°C - 60°C.

Machine washing:

- medium soiling – 1 cap (65 ml)
- heavy soiling – one and a half cap (100 ml)
- we recommend for 4-5 kg of dry laundry

Hand washing:
- one cap (65ml) per 10 l

Volume **1L** =

STEP 2: Conditioning

Mr. Smell concentrated fabric softener protects from fur settling on fabrics and gives them pleasant softness. It gives the laundry a durable **lavender scent**.

Directions for use:

SOFT

VERY SOFT

Volume **1L** =

Mr. Smell washing liquids and fabric softeners are suitable for hand and machine washing.

Tip: Mr. Smell Duo washing liquid and fabric softener will help get rid of unpleasant smells from your clothes too if they have been soiled by your pet.

Washing with Mr. Smell:

- Effectively solves the problem – eliminating animal soiling and unpleasant smell of urine and faeces from animal beds, bedding, clothes and soft toys.
- Makes your life easier – protecting washed fabrics from fur settling.
- Provides good care for your animal – Mr. Smell laundry detergents give the fabrics a delicate lavender scent, which has a soothing effect on animals and encourages them to use freshly washed beds.
