

TOBO

Tirion system is elegant, classic furniture. They are distinguished by high quality materials and perfectly selected accessories which perfectly reflect the representative character of the furniture.

Their minimalist design was complemented by characteristic aluminium details, which appear both in the tops of desks and tables, as well as in the furniture feet.

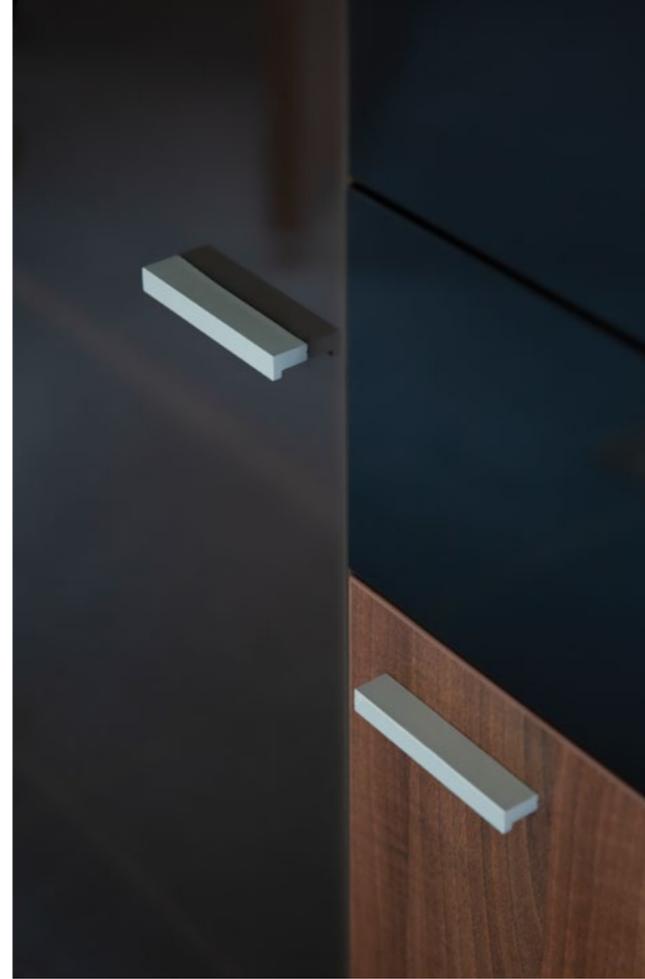

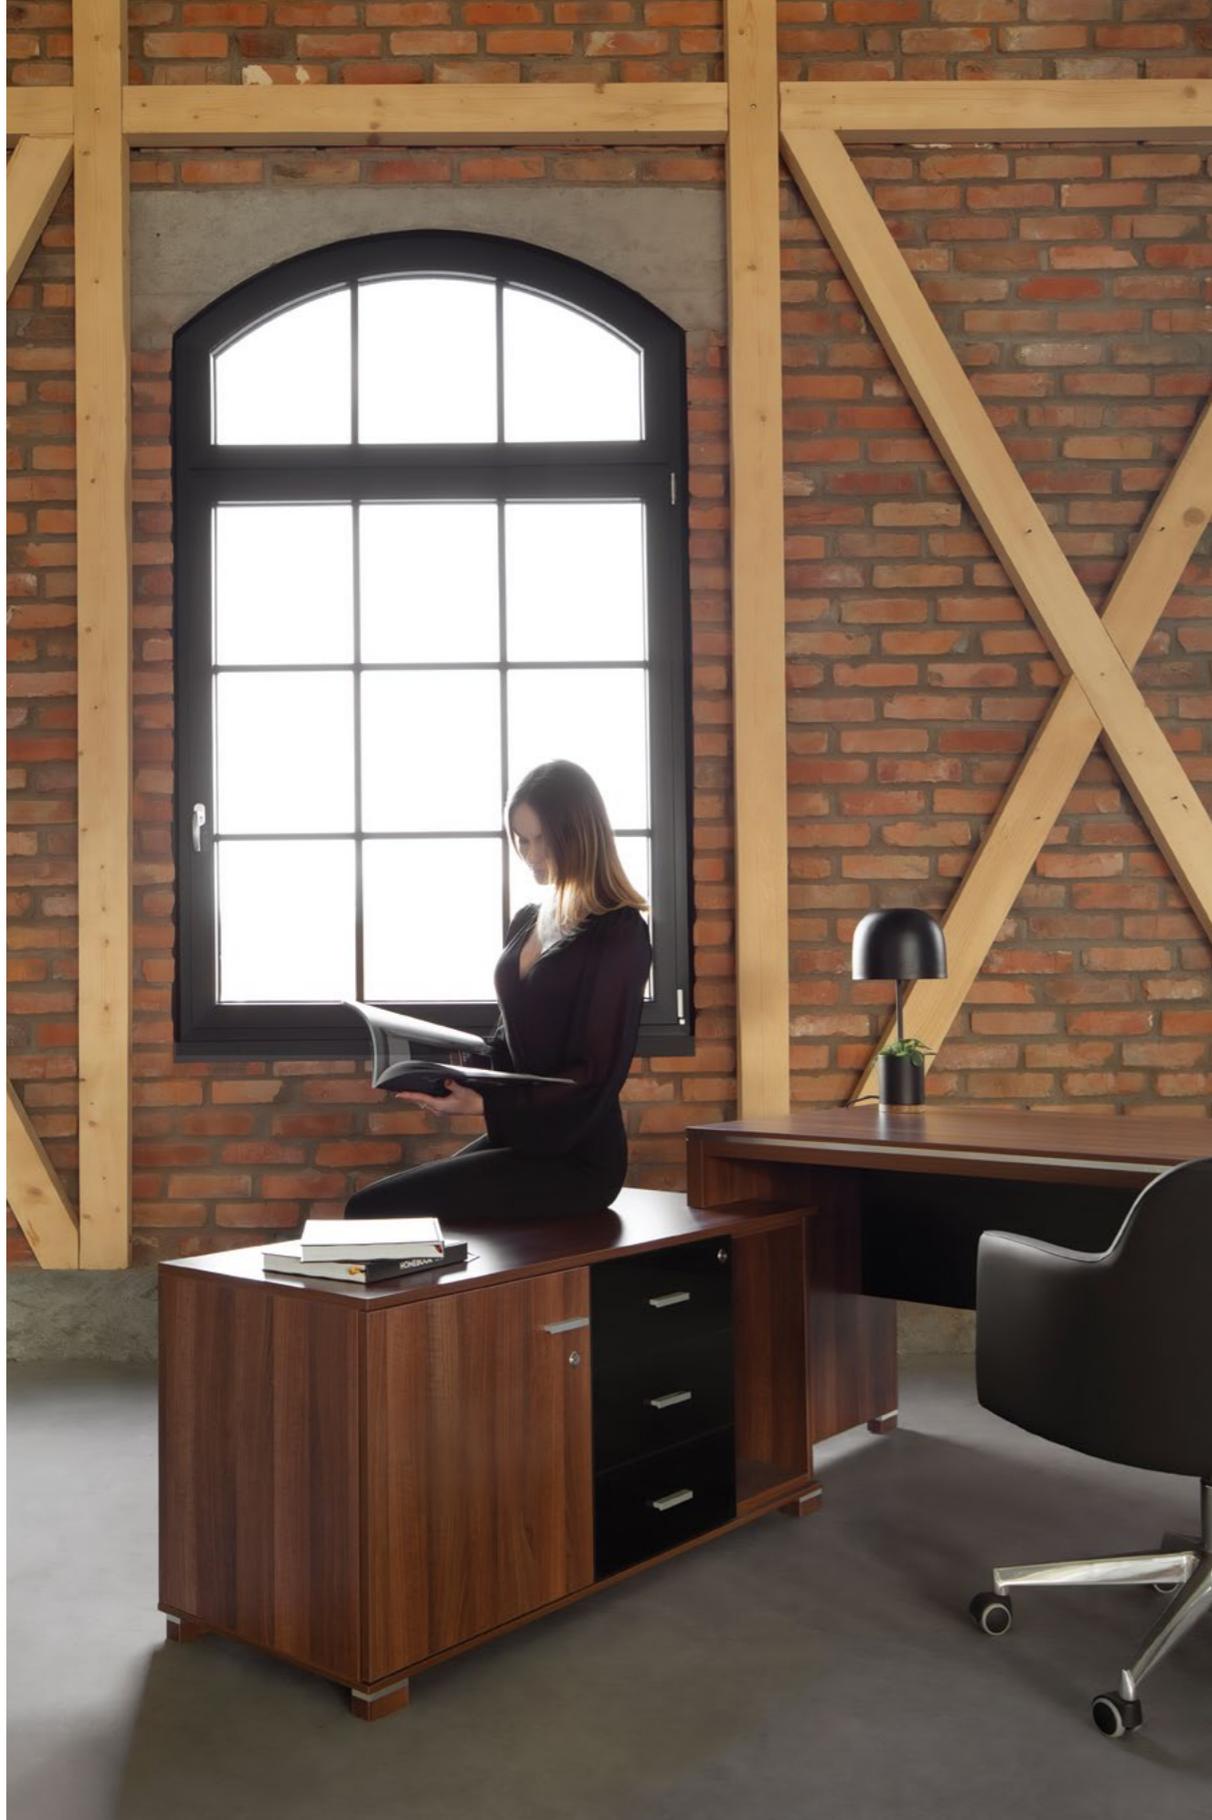

The lightness of the furniture is given by the 3-layer top made of several thicknesses of board, cut with an aluminium edge banding.

The Tirion system is also an original combination of materials. The matt, wood-like laminated board has been combined with fronts made of glossy acrylic board. Acrylic also appears in the covers of the desks.

In addition, frosted glass has been used in the fronts of the cabinets, which gives the furniture its elegance, while at the same time concealing its contents.

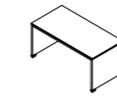

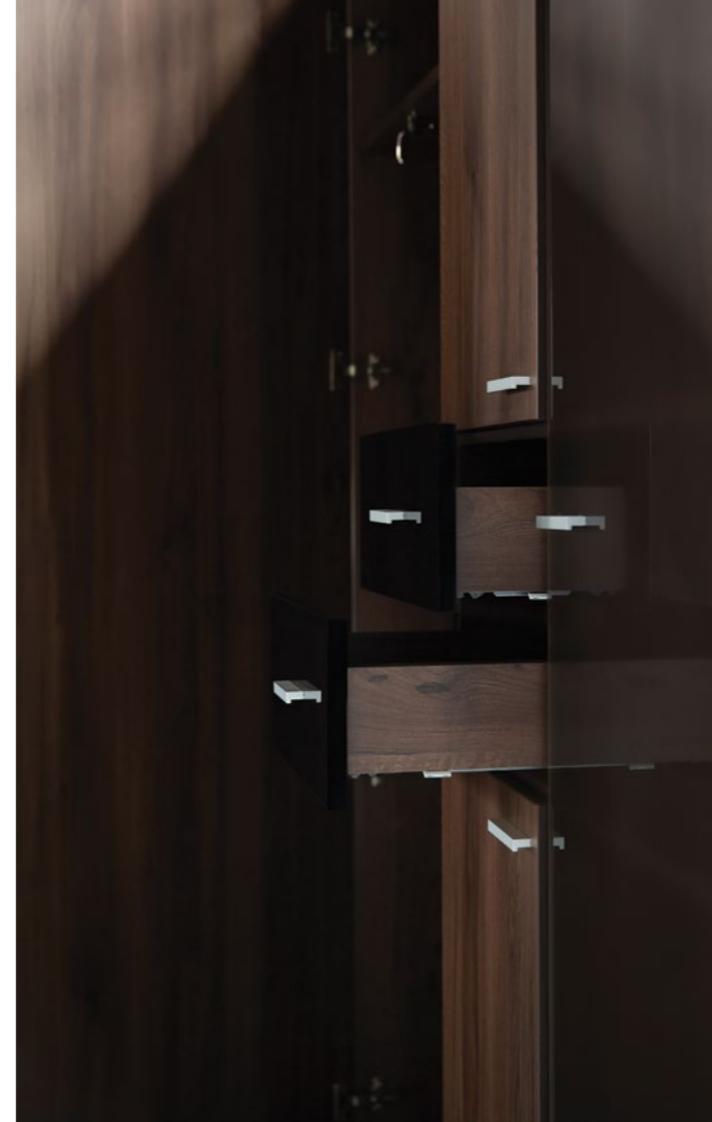

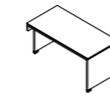

Tirion furniture allows you to arrange an ideal place for work, business meetings and conferences. The system also includes conference tables, coffee tables, as well as various types of cabinets and pedestals.

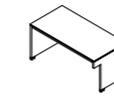

The Tirion system will also find its place perfectly in a domestic space. Thanks to the diverse range of solids it will perfectly equip both small and large offices.
