

# MOON KITCHEN

## Kitchen for an RV

An almost armored, ultra-lightweight, highly functional built-in kitchen in a van or camper. Build a kitchen in your car in... 4 hours.

### The first such kitchen.

MoonKitchen is the world's first full-size, self-assembly kitchen that you can order already assembled. Created for preparing meals, with the whole family. For campers, vans and caravans.

### Resilient, roomy and organized.

We painted it entirely with a special powder coating, so it is very resistant to scratching and abrasion. It doesn't take up much space in the RV and cooking on it is a pleasure. Drawers on strong rails will allow you to pack up to 630 liters of kitchen equipment and food.

### Excellent quality.

Built with high-quality aluminum reinforced with ribbed construction and polycarbonate plate. The kitchen will serve you without any problem, for years.

### Choose from a variety of colors.

The drawer fronts will match all our products. They are upholstered and finished with soft upholstery in 5 colors. The materials used in MoonKitchen are waterproof, strong and easy to clean.

# MOON KITCHEN

## Three comfort zones.

Moon Kitchen is divided into **three zones**.

**The first** is a space for a built-in refrigerator with dimensions of height: 54 cm, width: 40.5 cm, depth: 55 cm and a functional recess. This is a space for a tourist gas stove..

**The second zone** is a sizable space for the sink and faucet, which, in addition to the plumbing, will accommodate a lot of useful gear.

**The third zone** consists of three capacious drawers for organizing the space. This is a very convenient solution.

#### Compatible with:

Mercedes Sprinter 901/903/904/906/907, VW Crafter I 2007-2016/ LT <2006, Ford Transit <2013, RAM Promaster >2013, Fiat Ducato III >2006, Citroën Jumper II >2006, Peugeot Boxer >2006

#### Two variants:

1. Kitchen with countertop (50 cm wide) and sink (sink and drain installed).
2. Kitchen without countertop and sink (construction with cabinets alone)

The kitchen is available for L2H2 (142cm) and L3H2 (162cm) versions.

The kitchen does not come with a faucet.

Van der Moon  
**and everything has its place.**

# MOONGRILL

## for a spare wheel

Whether you're out in the field or craving something warm in your own garden, it's good to have the Moon Grill on hand. It's a combination of a grill and a frying pan. It heats up quickly and maintains temperature perfectly. It is made in high quality stainless steel. The design allows it to stand stably, even in difficult terrain. Assembly and disassembly is simple, so it is easy to take it apart for thorough cleaning. Fastened to the spare wheel, it is always at hand to throw something on the grill.

**Stable construction**  
on three legs

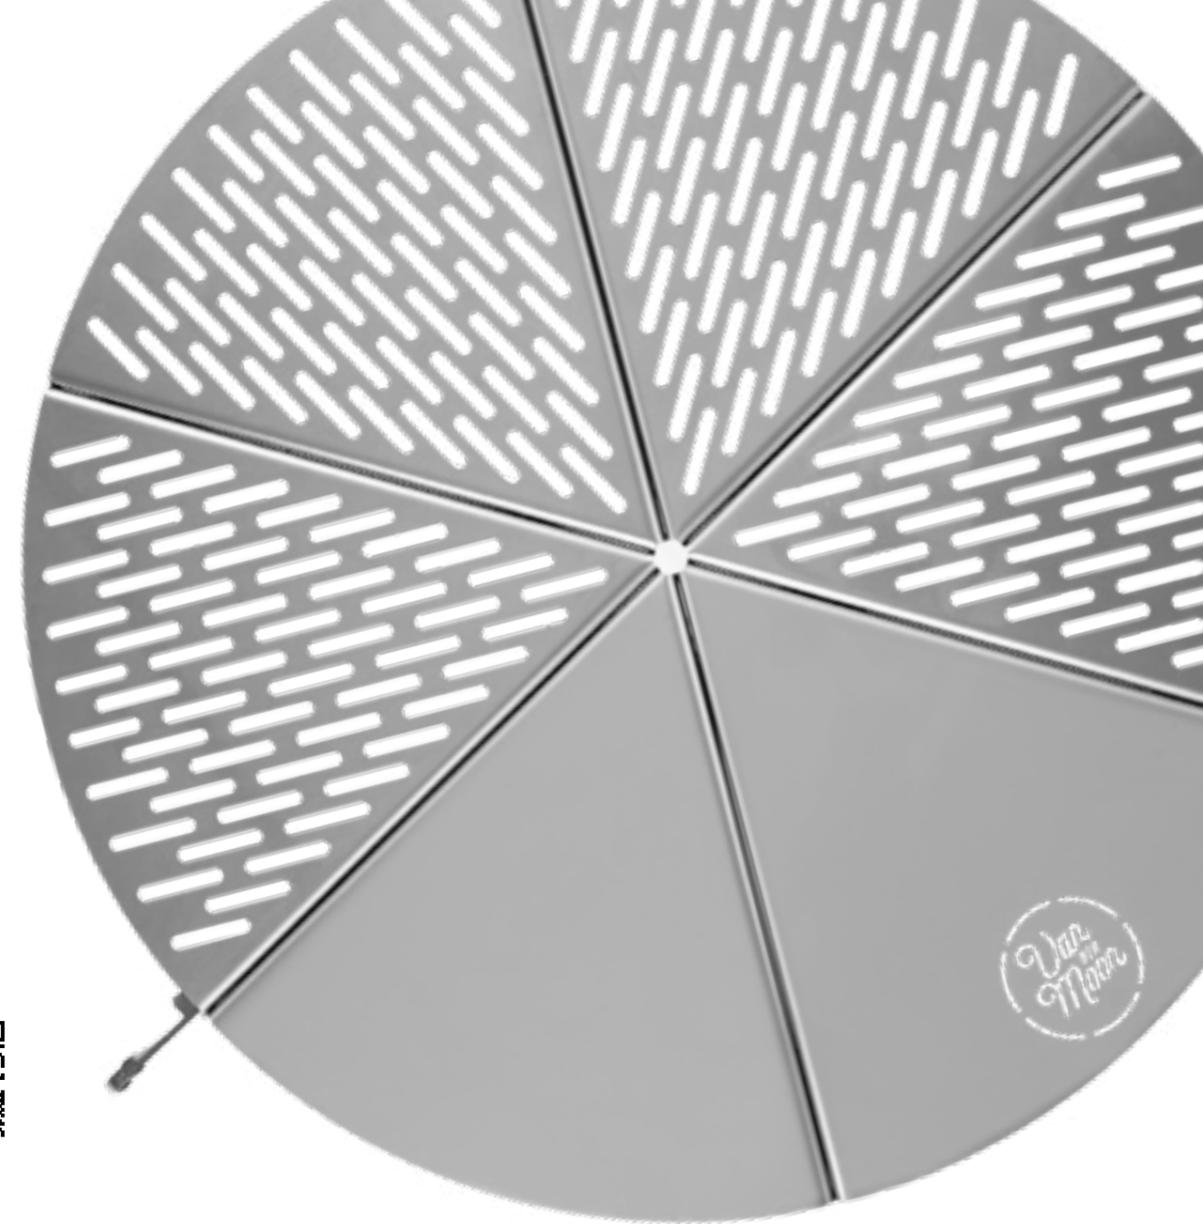

**Indestructible**

**Easy transportation**  
on the spare wheel

### Spare wheel grill

Wherever you get the urge for something grilled.

**Easy** installation.

Assembly is simple, intuitive and instant.

## MOON **WINDOW**

High quality tilt window with roller blind and mosquito net for camper and caravan. Side windows, tilt windows are especially useful for those who spend a lot of time in their cars. They provide the interior with plenty of light, and allow you to enjoy the views even in bad weather.

# MOONWINDOW

## Window for an RV

Moon Window camper windows, are made of double insulated acrylic glass and polyurethane frame with high resistance to cold and heat transmission. The structure was reinforced with an aluminum frame over the entire surface. Gentle ventilation protects the windows from chaffing or freezing from the inside. Our tilt-up camper window is designed to be used in Iceland in winter and Tunisia in summer.

**Mosquitoira** effectively protects against insects

Customers praise **durability and safety**

High **quality**

Blackout blind for a good night's sleep

**Universal** size

### MoonWindow 40x70

Dimensions: 750x450  
Wall thickness: 25-35 cm

Dimensions: 550x570  
Wall thickness: 25-35 cm

### MoonWindow 90x50

Dimensions: 950x550  
Wall thickness: 25-35 cm

# WINTERMO

## Window heat shield

Moon Wintermo window blind with thermal-cell system, is easy to install and operate. It primarily serves as an insulator for the factory windows in the van when there are large temperature differences between the interior and exterior. Wintermo ensures that steam does not condense on the windows at night. In addition, it darkens the interior allowing for healthy sleep. Designed to be rolled up with one finger. Thanks to its design with magnets, it allows you to adjust the height of the blind and keep it in place while driving. Wintermo is the perfect way to insulate the heat in your car.

**Quick installation**

**Thermal insulation**

**Strong magnets** hold the coiled shape

Protection against **fogged up windows**

**High-speed** accordion folding

Mounting on **suction cups**

# Wintermo

**Warm or cold.  
As it should be.**

# MOON **MOSQUITONET**

## Mosquito net

If you travel by van, you are bound to be frequently accompanied by stowaways - insects, arachnids, ticks, beetles and flies. Mosquito nets are a key defense against various insect-borne diseases. The exterior of the mosquito net is permanently mounted to the vehicle, but quick removal is possible thanks to a zipper. Sewn-on straps allow you to roll up the mosquito net as a whole or in zones. In the sleeping section, we recommend mounting Moon Mosquito Net with built-in Wintermo.

Excellent **functionality**

**Ties with rivets** for retraction of the misfit

**Magnets** sewn into the fabric

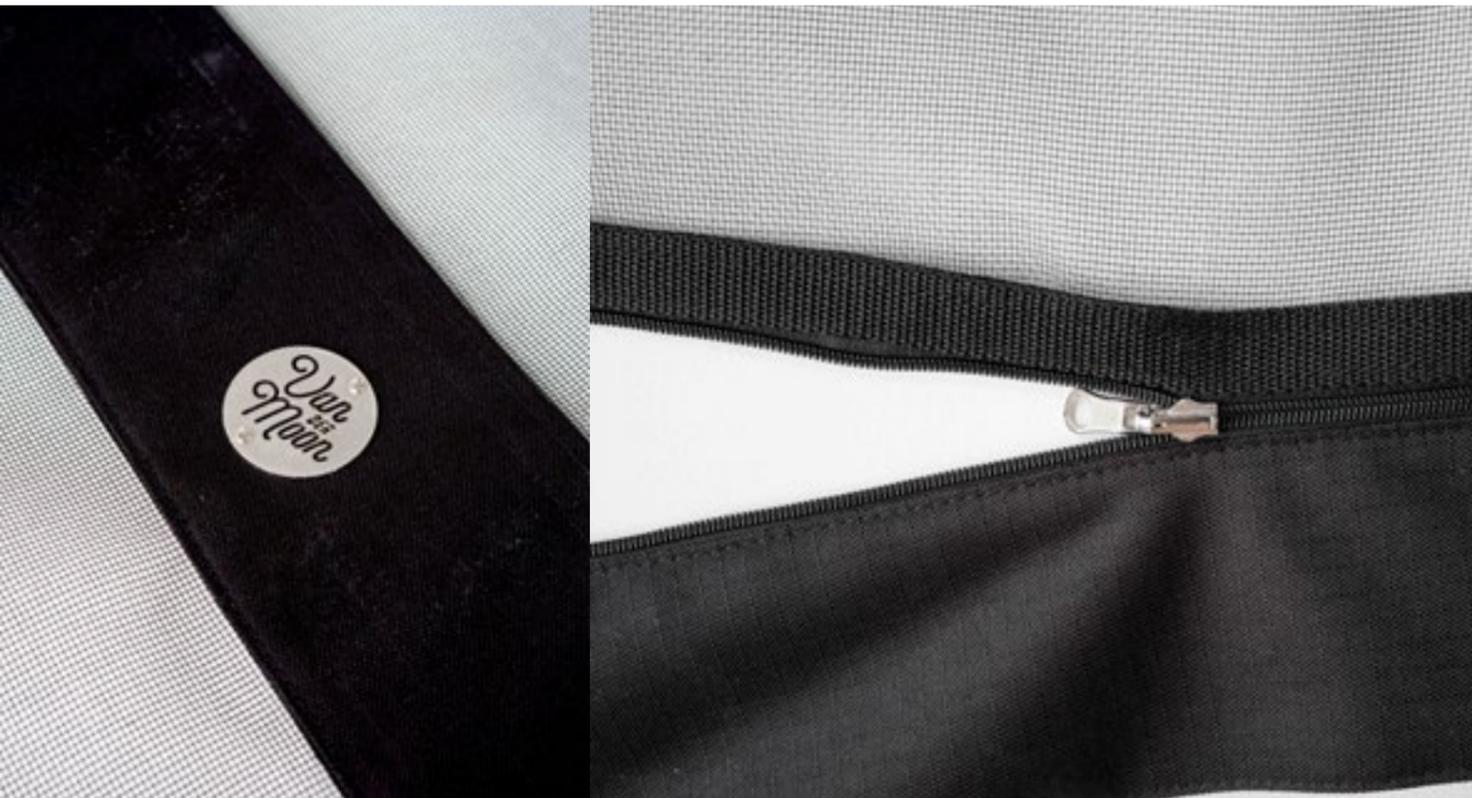

**Zipper**

Effectively **protects against insects**

**Quick installation** thanks to a sewn-in strip

# A new level of comfort

Traveling in an RV is the perfect solution for everyone Lovers of independence and freedom. To comfortably and conveniently Travel the quality of your equipment is important. It determines how you will spend each day and each kilometer driven. What is important is both how functional the selected body is, and how it behaves while driving. After all, no one likes extra crackling, grinding and noises. High-quality furniture in your RV means daily, comfortable rest and a trip full of comfort.

# MOONFRAME MOONFIX

Perfectly matched to your car, the accessories streamline an already simple installation. They are lightweight but durable. Prepared to perform their function for many years.

The Moon Fix Frame kit consists of Moon Frame, which are metal crossbars that reinforce the vehicle's structure, and special Moon Screw butterfly bolts with a welded foot. The Moon Fix Frame kit is a must-have when installing Moon Boxes. The screws fit perfectly into AirLine strips shortening the installation of MoonBoxes to a minimum.

## MOONFRAME

Structural reinforcement, used for the installation of Moon Box, Airline slats or other suspended accessories.

## MOONFIX

Assembly is simple, intuitive and instant.

# A product that was born **out of necessity.**

Van Der Moon is the sum of our experience as travelers and the background we have built over the years as Vitberg.

The production line at the Vitberg factory is a state-of-the-art workshop where human hands, assisted by specialized machinery, have been assembling advanced medical products for more than 30 years. The idea of making life easier on expeditions was born out of a private need to travel. With the support of designers, machinery and specialists, the design of the first MooBox was created - a locker for our Patrol that doesn't creak or creak in the wilderness, in which things stay in place even on the biggest verges, and one that can be taken to a hotel room with us when needed. After fine-tuning, reinforcement and careful sewing, we decided to share our product with you. Because since it worked well for us, we guarantee that it will not disappoint you either.

>  
**Precision** and quality..  
Here modern technology meets  
human hands to create a whole

# COMPATIBILITY

Check out the products we have prepared for your car.

We are constantly developing our offer by introducing more car models to the compatibility list. Each car model differs, among other things, in the angle of the wall in relation to the roof, the recesses in the rear doors, the arrangement of electrical harnesses, etc. You don't have to wonder which version of the product to fit your car - we will do it for you!
